Kawatch-ViCode DAY 1 Progress :

01. Initialised Project via React

Organized all assets and directories for starting

02. Made Initial Components

Initial components for the landing page were made

03. Installing npm packages

Installed various required packages via npm

04. Title Bar and Feature components

Added title bar,Feature state and feature components for proposed features

05. Added 3D view

Integrated 3D iframe as proposed

06. Debugging

Debugged all the necessary bugs and and improvised design via CSS

Changes made in proposed features:

We have sticked with the initial design. Hence, there weren't any significant changes.

Extra Added features:

No extra features have been added. Since, Most of the time was spent on the initial design implementation and research on what more can be added.

Features we are going to add:

1.Make the website responsive with mobile compatible design
2.Substitute existing components with their carousel versions for mobile
3.Work on effects such as Scroll and Reveal to make the website more Intuitive
4.Improvise design if needed
5.Add specifications section
